

## UNOTRON ScrollSeal® 2.4GHz Washable Wireless Mouse (WM10)

The ScrollSeal® 2.4GHz Wireless Washable Mouse provides a positive step towards solving the problem of bacterial cross infection.

The sealed design means that every recess can be sterilised by immersing in Hospital grade antibacterial solutions, including the scroll wheel which can be easily removed and simply clipped back into place when clean.

The mouse works up to 8m away and by using our advanced wireless technology, it eliminates cable clutter and lets you work the way you want to. SpillSeal® protected water and dustproof keyboard to NEMA4X and IP66, provides an easy solution to the problem of bacterial infection. Use the keyboard with confidence in many different, home or work environments and even wash it under a tap.
